DESCRIPTION

Pure copper OCC-6N & OFC-4N (2.5 mm^2) in a STAR structure composed of 19 concentric conductors, offering perfect structural stability, optimizing transfer and velocity over all audio frequencies, including very high frequencies, for total respect of higher harmonics.

Triple shielding for perfect insulation from surrounding radiation: polyethylene (PE) sheathing, cotton yarn filler (mitigating inner micro-vibrations) and aluminum mylar foil contributing to a realistic and airy soundstage with perfect separation of musicians.

Easy metric marking for custom cutting.

Resistance: 0.006704 Ω/m
Inductance: 0.9944 µH/m
Capacitance: 93.088 pF/m

FINISH

Anthracite grey - Smooth texture
Metric marking
Size: Ø10 mm
Spool: 100 m

CONDITIONING

Quantity / box: 1 spool
Type: Box
Dimensions (W x H x D) : TBC
Weight : TBC
